Notes

- a Balances are created as a function of accounting and managing all collateral pool entities collectively, where debt is only carried on certain companies, but all companies' cash sweeps to one account. All Companies have filed Chapter 7 bankruptcy. All intercompany relationships among collateral pool eliminate and are believed to have no fair market value.
- b This represents direct and allocated expenses of Grover entities that were paid for by MPO/SPO/AS out of convience in managing the entire group. Internally these costs were not intended to be paid but were considered to be offset with intercompany payables and remaining net balances were held in anticipation to offset against future intercompany activity. Costs expected to be reimbursed were not run through the intercompany account but were processed through Trade Accounts Receivable/Payable.

c

Intercompany receivables with Real Estate companies are more correctly reflected as Leasehold Improvement costs. These Leasehold Improvement costs are presumed to have no fair market value to the Debtor lessee upon lease termination.

d

Intercompany payable balances were created when Grover performed contract service drilling activities for the collateral pool companies. Balances were not always settled in cash as they were internally considered to net against intercompany payable balances.

e

Intercompany payable balances are the result of real estate leasing invoices not being full paid; payment was limited to amounts necessar to fund the real estate companies' debt service needs.
